

FIG. 1

FIG. 2

FIG. 3

[Faint, illegible handwriting]

The diagram illustrates the X-Cert architecture. A central circle represents the system boundary. Inside this circle, at the top, is a 'Persistent Archive' (cylinder). Below it are two servers, P_1 and P_2 , connected by a horizontal line labeled 'X-Cert'. Below the servers is a 'Load Balancer' (rectangle). The Load Balancer is connected to multiple client servers, labeled C_1 , C_2 , ..., and C_n .
